
Release Overview – FileFinder 11.42

Here's a snapshot of what we've delivered in this release:

- Resume/CV parser has been updated
- List Manager has been enhanced
- Global Last Contact date added to all module lists
- "Is Blank" option added to Last Contact field in Person Search
- 'Color Category' added to Marketing Campaign Contacts tab
- "Location" field added as a mappable field in Bulk Import
- Email field added to the "Up For Renewal" list on the Compliance Homepage
- Intelligence Subject field character length has been increased to 250 characters
- Fixed an issue when setting a default value for Nationality did not work
- Fixed an issue when running a Post Code Radius search with Address Type included, it would show a "Cannot Connect to Server" message and FileFinder would close
- Fixed an issue with 'Actual Completed Date' not being populated in Assignment Search results
- Fixed an issue with "Search Through List" crashing if you ran a Document Search

New Functionality/Features and enhancements

- **Resume/CV parser has been updated and includes the following improvements:**
 - Fixed issue with LinkedIn URL getting cut off when parsing LinkedIn profiles
 - Improved and more accurate parsing results e.g. employment and personal data
 - Improved Skills parsing
 - Improved language Resume/CV parsing
 - Parsing is now done through an API so it will be easier to maintain and roll out updates for future releases

- **List Manager now includes the following improvements:**
 - List Name is now sorted in A-Z (ascending) order. Previously the order was random
 - Added "Owning User" (Created By) and "Created On" columns
 - Users can sort by "Name", "Created On" or "Owning User" columns

- 'Find Panel' has been added to allow users to find any specific lists

- **You can now add People records to other users list through Copy/Move records**
 - Under the View drop-down menu, select the "All Lists" view and all users lists will be available. You can then select the list you want to copy records too

- **Global Last Contact date added to all module lists**
 - New 'Contacted On' column will show when the person was last contacted on the current Assignment or Marketing campaign
 - 'Last Contact' will now display when the person was last contacted across all modules and not just on the current project

- **Intelligence Subject field character length has been increased to 250 characters**
 - Previously it was set to 50 characters, it has now been increased to 250 characters

The screenshot shows a web application window titled "Intelligence:New Person1". Inside, there is a "New Person1" header with "Person Id: 1969". Below this is an "Actions" menu with "Intelligence" selected. A "New Intelligence" modal form is open, containing the following fields:

- Informant:** * New Person
- Subject:** * The number of characters in the subject field in Intelligence has been increased to 250 (highlighted with a red box)
- Send To:** [Searchable dropdown]
- Comment:** [Text area]
- Link To:**
 - People:** [Searchable dropdown]
 - Company:** [Searchable dropdown]
 - Industry:** [Searchable dropdown]

Buttons for "Help", "OK", and "Cancel" are at the bottom of the form.

Bug Fixes

Setting a default value for Nationality does not work

Add a default value for Nationality in Admin
Make Nationality a required field
Create a new person record
Nationality is blank and does not show the default value.

This has been fixed.

Post Code Radius search error

When running a Post Code Radius search with Address Type included it would show a "Cannot Connect to Server" message and FileFinder would close.

This has been fixed.

'Actual Completed Date' not being populated in Assignment Search results

If you select an Assignment Status code of "Finished" or any of the Assignment Completed Status codes, it automatically adds the Actual End Date in the Milestones section.

However, this did not populate the Actual Complete Date, so in the search results it would show the Actual Complete Date as blank.

This has been fixed.

"Search Through List" crash

"Search Through List" crashes if you run a Document Search e.g., they are entering "marketing" and searching through a list of 10 candidates in an Assignment, and after a few minutes they get this crash:

Database error occurred. ---> System.Data.SqlClient.SqlException: The query processor ran out of internal resources and could not produce a query plan. This is a rare event and only expected for extremely complex queries or queries that reference a very large number of tables or partitions. Please simplify the query.

This has been fixed.

Subject Access Request Report (Word) was running in a constant loop if there were any Contracts added.

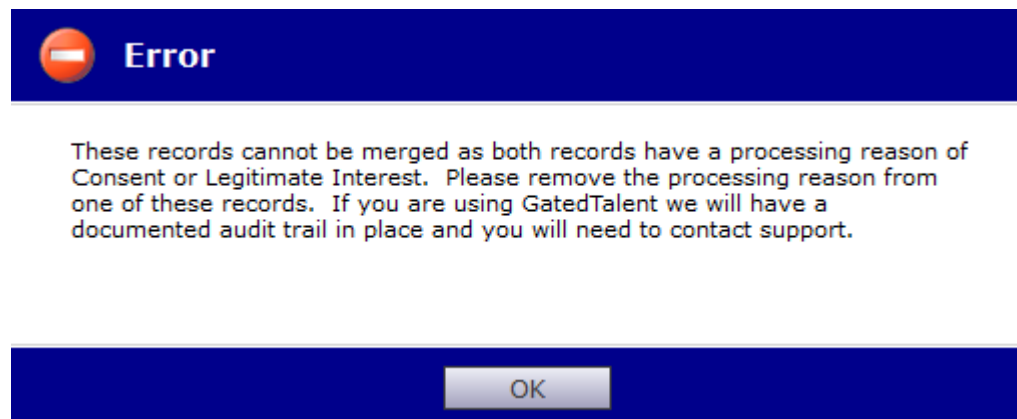

This has been fixed.

"Renewal Date" is spelled incorrectly

On the Person Compliance tab, "Renewal" is incorrectly spelled "Renewel".

This has been fixed.

GatedTalent warning message would appear when trying to merge two records

This message has now been removed and the records can now be merged.

"Create Report" has pink background

When running "Create Report" on any list it shows a pink background instead of white.

This has been fixed.
